

FNP Sales Analysis Dashboard Report

Project Overview

This project presents a sales performance analysis for FNP using Microsoft Excel. The dashboard was designed to transform raw transactional data into actionable business insights through interactive visualizations, KPI tracking, slicers, and trend analysis.

Business Objectives

- Analyze revenue performance across categories, occasions, cities, months, and weekdays.
- Monitor order volume and delivery performance.
- Identify top-performing products and sales periods.
- Support data-driven decision making through interactive reporting.

Tools & Techniques Used

Microsoft Excel, Pivot Tables, Pivot Charts, Slicers, Timeline Filters, KPI Cards, Dashboard Design, Data Aggregation, Business Reporting.

Key Performance Indicators (KPIs)

- Total Revenue: ■5,42,226
- Total Orders: 1000
- Average Revenue per Order: ■3,520.98
- Average Delivery Time: 5.53 Days

Executive Summary

The dashboard highlights strong sales concentration around celebration-based occasions. Anniversary-related purchases generated the highest revenue contribution. Product categories such as Colors and gifting-related items significantly influenced overall sales performance. Monthly trend analysis indicates seasonal fluctuations, with August emerging as the strongest revenue-generating month. City-level analysis reveals notable demand from Imphal and Dhanbad.

Detailed Insights

Revenue by Category

Colors generated the highest revenue contribution, indicating strong customer demand within this category.

Revenue by Occasion

Anniversary occasions recorded the highest sales revenue, followed closely by Raksha Bandhan and Holi.

Revenue by Month

Sales performance peaked in August, suggesting seasonal demand patterns that can be leveraged for future campaigns.

Revenue by Day

Tuesday produced the highest revenue, while mid-week performance remained relatively stable.

Top Cities by Orders

Imphal and Dhanbad demonstrated the strongest order volumes among the leading cities.

Business Recommendations

1. Increase inventory and marketing investment around Anniversary campaigns.
2. Prioritize high-performing categories during festive and seasonal promotions.
3. Investigate customer behavior in top-performing cities to replicate success in similar markets.
4. Plan promotional campaigns around August and other peak sales periods.
5. Optimize delivery operations to further reduce average delivery time.

Skills Demonstrated

Data Analysis, Dashboard Development, Business Intelligence, KPI Reporting, Data Visualization, Excel Analytics, Problem Solving, Insight Generation.
